Welcome

On behalf of the GLBC family, we would like to sincerely welcome you to the 7th annual GLBC Sim-Angus Bred Female Sale. We realize how truly blessed we are with the opportunity to do what we love and to do it with wonderful customers and friends, like you. We cherish your support and continued commitment to the GLBC prefix.

Our Goal is the same now, as it was back when we started 46 years ago-to provide you, our customer, with genetics that will not only keep you profitable today but create lasting impact and profitability for your cow herd for years to come. We do this by using all the tools available to us, both phenotypic and genomic. We have been performance testing by taking birth, weaning, yearling, and mature cow weights. We also have utilized ultrasound, carcass testing, foot, leg and docility evaluation throughout the years. We send in DNA on each animal born for genomic testing to provide you, our customers with the most complete and accurate EPD profiles. Now with even a new tool from Top Genomics, every mating is from Right Mate and every animal has a right choice score. This new genomic evaluation has made an impact.

2026 has proven to be a Great time to be in the Cattle Business, with record highs in all classes of cattle, and that excitement surrounding our industry is here to stay for a while. What a great time to add to your herd.

We are very proud of this offering and believe it is one of our strongest sets to date.

Thank you very much for your continued friendship and support. Customer satisfaction is a top priority at Great Lakes Beef Connection as we want every customer to be a repeat customer. If there is anything we can do to aid in your selection process, we are happy to help. Feel free to call and visit anytime.

Sincerely and God Bless,
GLBC Family

The John Miller Family

The Andy Salinas Family

The Steve Oman Family

The Brian Harris Family

Improved Buying Confidence with Greater Genomic ASSURANCE

Access to more and better information has always been key to making wise decisions. The evolution and improvement of genetic evaluation tools too has given us an ever-clearer picture of the true genetic makeup of cattle and thus a better view of the value proposition. RightMate, powered by Top Genomics LLC is taking the evaluation of genetics and genomics one giant step further. By combining specific genomic information with the long-proven value of EPDs, this new advancement in technology improves our depth and precision when evaluating the actual ability to transmit value and profit.

The 3 Accreditation Logos below are designed to simplify bull selection and improve buyer confidence by more accurately describing the genetics offered and by reducing risk. What this means to you as a customer is a much greater assurance that you are getting both what you want and need from the genetics you purchase. What it means to your seedstock provider is access to RightMate technology that simply sets them apart from the rest of the industry.

ACCREDITED GENOMIC PLUS – For the majority of producers who simply need consistent and balanced genetic improvement, without genomic setbacks, G+ Accredited bulls should be on your list for premium purchase. These sires will absolutely move you forward for both cost reduction and income producing traits and substantially reduce risk when compared to all other evaluation programs. It's simple, the right genes are in these bulls to help secure a profitable future and the they have great EPDs to match!

ACCREDITED CALVING EASE – Simply find bulls with the ACE logo for third party Accredited, secure Calving Ease bulls. Though we have had tools in the past to assist in choosing heifer bulls, we've never had one nearly this effective. The reduced risk that comes with this genomic certification will simply make your decisions easier and your heifer calving season more successful. Purchase special purpose ACE bulls with confidence. They will deliver consistent and predictable calving ease.

ACCREDITED TERMINAL MATE – Just like an ATM machine makes it simpler to access your cash, the ATM Logo highlights bulls accredited to generate extra cash income as soon as your next calf crop! These bulls are meant specifically to use only on mature cows and for the purpose of adding performance, pay weight and end product value to market.

MARTY ROPP 406-581-7835

RightMate powered by TOP GENOMICS

AMERICA'S
COW
STAND STRONG
SIMMENTAL
The **Simmental** cow can handle any environment.
She's built to last in heat, fescue or high altitudes. Thanks to the breed's built-in adaptability, you can match Simmental genetics to your environment; **SimAngus™**, **SimAngus HT**, **Simbrah** or proven Simmental genetics.
Meet America's all-purpose cow with the heterosis boost commercial cattlemen need.

ASA QUICK REFERENCE TO EPDS, INDEXES AND $VALUES

EXPECTED PROGENY DIFFERENCES (EPDS): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing in what units they are expressed. For example, if the above case referred to weaning weight EPDs, sire A would be expected to sire 15 pounds more weaning weight than sire B. If calving ease was the trait, sire A would be expected to sire 15 percent more unassisted births in first-calf heifers; in other words, if sire B sired 30 assists in a group of 100 heifers, we would expect sire A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For more detailed information about EPDs and $ indexes, visit www.simmental.org.

Listed below are the units in which ASA EPDs are expressed:

ALL-PURPOSE INDEX (API): Dollars per cow exposed under an all-purpose-sire scenario.
BACK FAT (BF): Inches of carcass backfat at 475 days.
BIRTH WEIGHT (BW): Pounds of birth weight.
CALVING EASE (CE): Percent of unassisted births when used on heifers.
CARCASS WEIGHT (CW): Pounds of carcass weight at 475 days.
DOCILITY (DOC): Percent of offspring receiving a disposition score of 1 (docile).
MATERNAL CALVING EASE (MCE): Percent of unassisted births in first-calving daughters.
MILK (MLK): Pounds of weaning weight due to milk.
MARBLING (MARB): Carcass marbling score at 475 days.
MATERNAL WEANING WEIGHT (MWW): Pounds of weaning weight due to milk and growth.
RIBEYE AREA (REA): Square inches of carcass ribeye at 475 days.
TERMINAL INDEX (TI): Dollars per cow exposed under a terminal-sire scenario.
WEANING WEIGHT (WW): Pounds of weaning weight.
YEARLING WEIGHT (YW): Pounds of yearling weight.
YIELD GRADE (YG): Carcass yield grade score at 475 days.

$ INDEXES: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide pieces of the economic puzzle. This is where $ indexes come in. Through well-conceived, rigorous mathematical computation, $ indexes blend EPDs and economics to estimate an animal's overall impact on integrated commercial production. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following $ indexes:

ALL-PURPOSE INDEX (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

TERMINAL INDEX (TI): Evaluates sires for use on mature Angus cows with all offspring put on feed and sold grade and yield.

For more detailed information about EPDs and $indexes, visit: www.simmental.org

IRON CREEK NEVER SAY NEVER 9 Sire of Lots 33-36.

NEVER SAY NEVER *Reference Sire*

Some of our favorite SimAngus females come in the Iron Creek Never Say Never sire group. The females are long-bodied, super sound, and will get your attention from the profile. We expect them to raise herd bulls who will generate premiums.
